Technical sheet

Product designation:

High-intensity photoluminescent safety signs

Product description:

2 to 3 mm thick photoluminescent rigid PVC with an easy-to-clean, anti-static surface.

Distributed by:

Fire behavior:

Non-flammable, self-extinguishing.

Product installation:

- Choosing signs and their heights;
-Different ways of attaching them;
-Dimensions and maximum viewing distances
(See Publisinal Catalog)

Dimensions, Pictograms and Color:

In accordance with national and international legislation, according to the Catalog

Printing:

Screen-printed with high-quality, UV-resistant inks.

Photoluminescent properties:

The products comply with Portuguese legislation, in accordance with UNE 23025

Luminous Intensity (mcd/m2)		Autonomy	
10 Minutes	210	0,32 mcd/m^2	3000
60 Minutes	29		

Under conditions of stimulation on the product of 1000 lux for 5 minutes

1

Technical sheet

Cleaning:

Clean only with a dry or damp cloth without any detergents.

Safety & Health:

They are safe products and do not contain radioactive substances or any toxicity problems.

Guarantee:

Up to 5 years, depending on whether the product is cleaned and installed under normal conditions.
If placed outdoors, depending on the environmental climate, the period may be shorter.

Quality and Certification:

The products' quality is guaranteed by the method used to measure their photoluminescent properties.
Its strict control is ensured through a manufacturing process in which all the equipment is calibrated and
photoluminescent property tests are carried out in our own and external laboratories.
Certificate No. SIL-001/2018
